

SPRINT 1 REPORT

ROLE: TESTER

1. OBJECTIVE

The objective of Sprint 1 is to prepare the Test Plan and Test Cases for the Home Page, Registration Page, Login Page, and Forgot Password Page of the IT Asset Management System (ITAMS).

WORK DONE

Step 1: Cloned the project from GitHub repository.

Step 2: Executed the Frontend application successfully.

Step 3: Executed the Backend application successfully.

Step 4: Analyzed the Registration Page functionalities.

Step 5: Analyzed the Login Page functionalities.

Step 6: Analyzed the Forgot Password functionalities.

Step 7: Analyzed the Home Page navigation functionalities.

Step 8: Prepared Test Cases for all identified functionalities.

2. TEST PLAN

Item	Details
Project Name	IT Asset Management System (ITAMS)
Role	Tester
Sprint	Sprint 1
Modules Covered	Registration Page, Login Page, Forgot Password Page, Home Page
Testing Type	Functional Testing, UI Testing, Manual Testing
Future Tools	Selenium WebDriver, Maven, Jenkins

3. STEP 1 – REGISTRATION PAGE TEST CASES

Test Case ID	Requirement	Expected Result
RP01	Verify Employee Name field	User can enter full name
RP02	Verify Employee ID field	User can enter Employee ID
RP03	Verify Email field	User can enter Email Address
RP04	Verify Department dropdown	User can select Department
RP05	Verify Password field	User can enter Password
RP06	Verify Confirm Password field	User can confirm Password
RP07	Verify Register button	User can submit registration
RP08	Enter valid details and click Register	Registration successful
RP09	Leave Employee Name empty	Validation message displayed
RP10	Leave Employee ID empty	Validation message displayed
RP11	Leave Email field empty	Validation message displayed
RP12	Password and Confirm Password mismatch	Error message displayed
RP13	Click Login Here	Login page should open

4. STEP 2 – LOGIN PAGE TEST CASES

Test Case ID	Requirement	Expected Result
LP01	Verify Employee ID/Email field	User can enter Employee ID/Email
LP02	Verify Password field	User can enter Password
LP03	Verify Password visibility icon	Password should show/hide
LP04	Verify Forgot Password link	Forgot Password page should open
LP05	Verify Login button	User can click Login button
LP06	Enter valid Employee ID/Email and Password	Login successful
LP07	Enter invalid Password	Error message displayed
LP08	Leave Employee ID/Email empty	Validation message displayed
LP09	Leave Password empty	Validation message displayed
LP10	Click Register Here	Registration page should open

5. STEP 3 – FORGOT PASSWORD TEST CASES

Test Case ID	Requirement	Expected Result
FP01	Click Forgot Password link	Forgot Password page should open
FP02	Verify Email/Employee ID field	User can enter Email or Employee ID
FP03	Verify Send OTP button	User can request OTP
FP04	Enter valid Email/Employee ID and click Send OTP	OTP should be sent
FP05	Verify OTP field	User can enter OTP
FP06	Verify Verify OTP button	OTP can be verified
FP07	Verify New Password field	User can enter New Password
FP08	Verify Confirm Password field	User can confirm Password
FP09	Verify Password visibility icon	Password should show/hide
FP10	Verify Reset Password button	Password should be reset successfully

6. STEP 4 – HOME PAGE TEST CASES

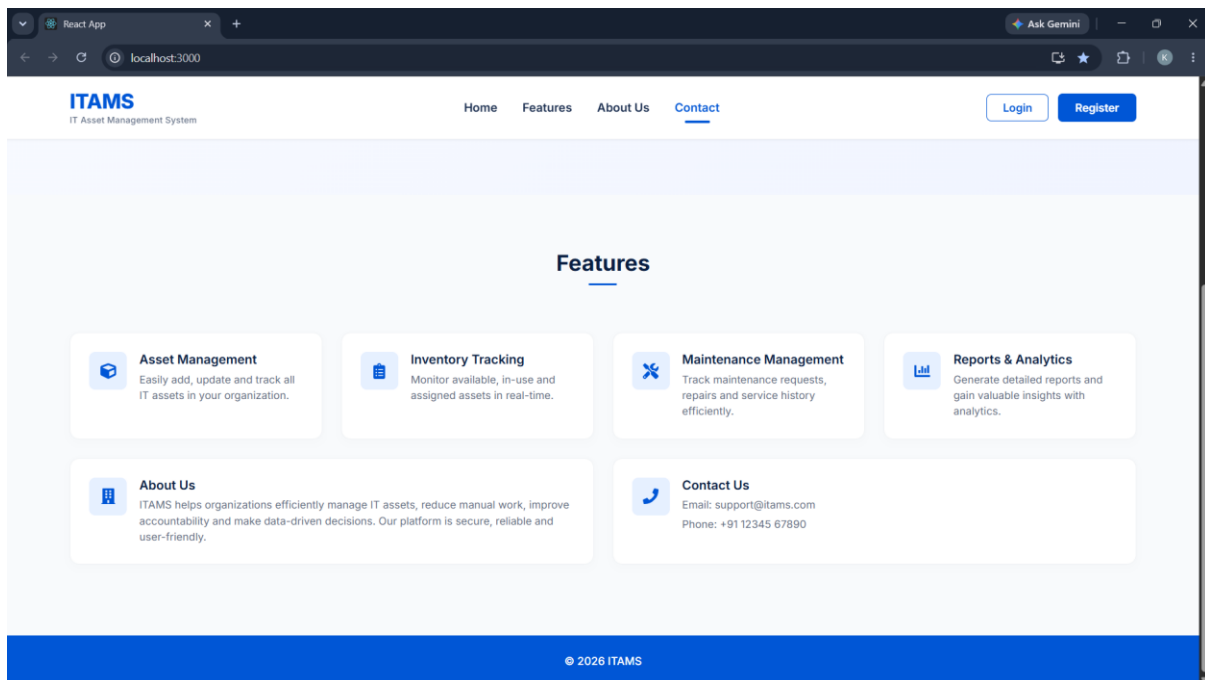

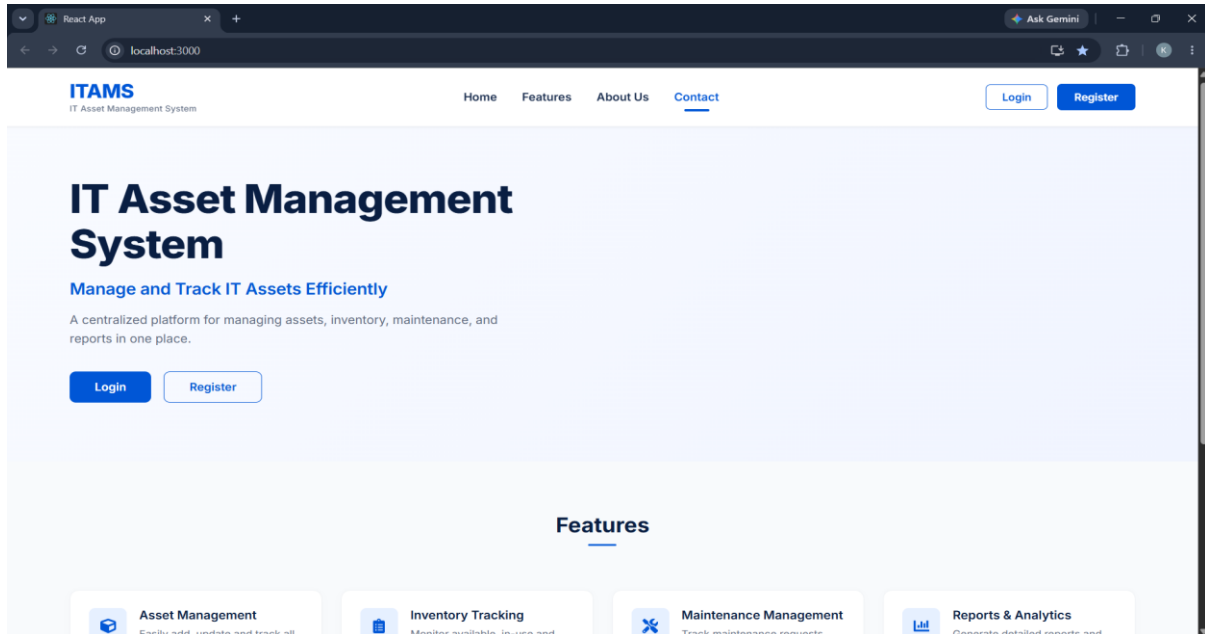

Test Case ID	Requirement	Expected Result
HP01	Click Home menu	Home page should be displayed
HP02	Click Features menu	Page should scroll to Features section
HP03	Click Login button from Navigation Bar	Login page should open
HP04	Click Login button from Home Page	Login page should open
HP05	Click Register button from Navigation Bar	Registration page should open
HP06	Click Register button from Home Page	Registration page should open

8. CONCLUSION

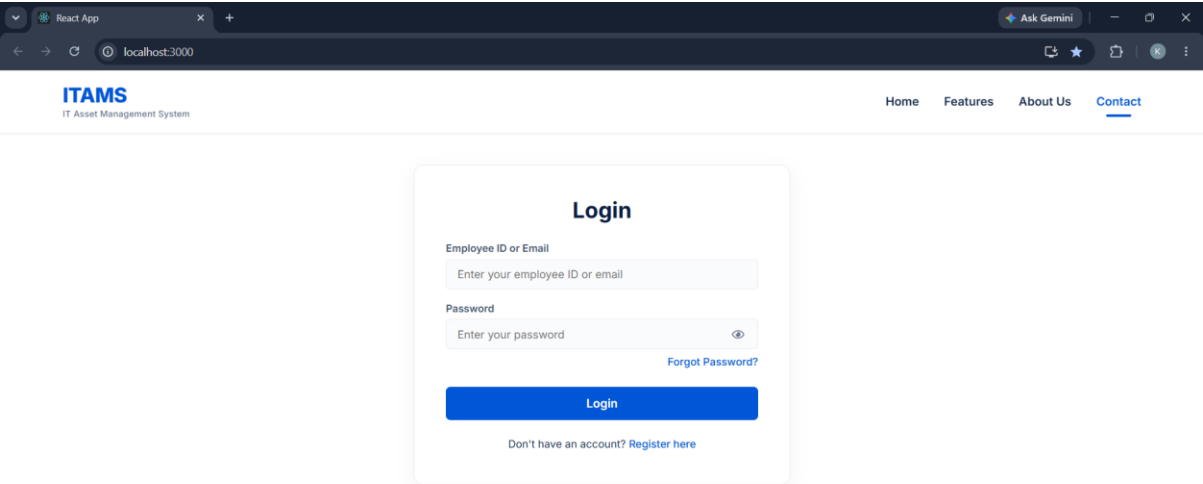

In Sprint 1, the Registration Page, Login Page, Forgot Password Page, and Home Page functionalities were analyzed and corresponding test cases were prepared. The frontend and backend applications were executed successfully. In the next sprint, these test cases will be automated using Selenium WebDriver and integrated with Jenkins.

Screenshot 5 – Frontend Running

```
PS C:\Users\konda\IT-assets-management\itams> npm start
(node:6288) [DEP_WEBPACK_DEV_SERVER_ON_AFTER_SETUP_MIDDLEWARE] DeprecationWarning: 'onAfterSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.
(Use 'node --trace-deprecation ...' to show where the warning was created)
(node:6288) [DEP_WEBPACK_DEV_SERVER_ON_BEFORE_SETUP_MIDDLEWARE] DeprecationWarning: 'onBeforeSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.
Starting the development server...
Compiled successfully!

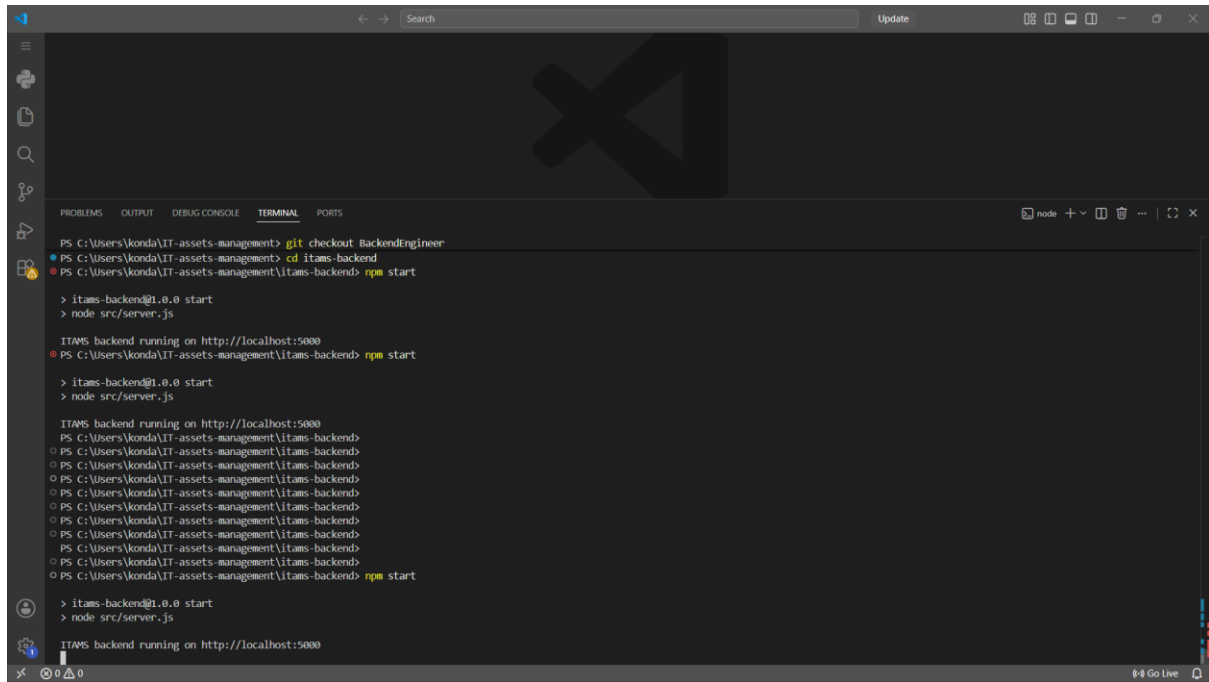

You can now view itams in the browser.

Local:    http://localhost:3000
On Your Network:  http://172.16.20.101:3000

Note that the development build is not optimized.
To create a production build, use npm run build.

webpack compiled successfully
```

Screenshot 6 – Backend Running

The screenshot shows the Visual Studio Code interface with the terminal window open. The terminal displays the following commands and output:

```
PS C:\Users\konda\IT-assets-management> git checkout BackendEngineer
PS C:\Users\konda\IT-assets-management> cd itams-backend
PS C:\Users\konda\IT-assets-management\itams-backend> npm start

> itams-backend@1.0.0 start
> node src/server.js

ITAMS backend running on http://localhost:5000
PS C:\Users\konda\IT-assets-management\itams-backend> npm start

> itams-backend@1.0.0 start
> node src/server.js

ITAMS backend running on http://localhost:5000
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend>
PS C:\Users\konda\IT-assets-management\itams-backend> npm start

> itams-backend@1.0.0 start
> node src/server.js

ITAMS backend running on http://localhost:5000
```

The terminal output indicates that the ITAMS backend is running successfully on <http://localhost:5000>. The Visual Studio Code interface includes a sidebar on the left with icons for Explorer, Search, and Run and Debug, and a top bar with a search bar and window controls.
